

Cable Monkey™

Cable Management Made Easy

All for the price of a sheet of gel

Cable Monkey™ easily slips onto battens or truss giving the user a quick and easy way to attach cable. Data and power cables each run in their own separate hook for easy access, troubleshooting, and reduced electrical interference. With integrated mousing points, cable can be secured for temporary use, permanent installations, or tours. Place a Cable Monkey™ every four feet and you're ready to go.
